

PAT Testing Services

Ensure your portable appliances are safe to use by carrying out PAT testing. Appliances that use a flexible cable or a plug and socket qualifies as a portable appliance, for example; extension leads, battery chargers, monitors, electric drills, kettles, photocopiers etc

Our engineers are PAT test qualified in “Level 3 City & Guilds in Service Inspection and Testing of Electrical Equipment (PAT)”

Our services include; visual inspection, testing to the IET code of practice 4th Edition, pass or fail labelling, report of results, recommendations and a certificate of testing.
